

MASTER LICENSE AGREEMENT (MLA)

Independent Living Program

NILPF Framework – Version 2.2 (2026)

This Master License Agreement (“Agreement”) is entered into between **Operator** and **Participant** for occupancy within the **Independent Living Program (“Program”)**.

The Program provides shared residential housing within a community environment designed to support independent living.

The residence is intended for **adults capable of directing their own daily living activities and personal healthcare decisions**.

This Agreement establishes a **revocable license to occupy** and is not intended to create a leasehold estate unless required by applicable law.

1. Purpose

The purpose of this Agreement is to permit Participant to occupy an assigned sleeping space within a shared residence operated by Operator.

The arrangement is structured as **Independent Living Program housing with shared occupancy**.

The Program provides housing only and does not provide medical care, personal care services, supervision, or treatment.

2. Nature of Occupancy

Participant is granted a **revocable, non-exclusive license to occupy** a designated sleeping space within the shared premises.

Participant acknowledges:

- No exclusive possession of any bedroom
- Sleeping spaces may be reassigned
- Common areas remain shared
- Occupancy is conditional

Participants acknowledge that the shared housing model operates as communal occupancy and that no Participant is granted exclusive possession of any bedroom, sleeping area, or portion of the premises.

Sleeping assignments may be adjusted as reasonably necessary to maintain the shared occupancy structure of the residence.

Participants agree that this communal structure is a fundamental condition of this Agreement.

This Agreement does not convey ownership or property interest.

If a court or authority determines tenancy laws apply, the parties agree to comply with applicable procedures.

Section 2A — Administrative Control of Premises

Operator retains administrative control of the residence for purposes of safety, maintenance, shared occupancy coordination, and enforcement of Program rules.

This administrative control may include:

- reassignment of sleeping areas
- inspection of common areas
- maintenance access
- enforcement of shared housing standards

Such authority does not constitute supervision of Participants.

3. Independent Living

Operator does not provide:

- Medical care
- Supervision
- Monitoring
- Treatment
- Case management
- Medication management

Participant remains fully responsible for personal needs, healthcare decisions, finances, and daily living activities.

Nothing in this Agreement creates a care, custodial, assisted living, residential care, hospice, or healthcare relationship.

Participants remain responsible for arranging any services they may require through third-party providers.

Section 3A — Change in Independent Living Status

Participant affirms they are capable of living independently within the shared housing environment.

If Participant experiences a change in condition that indicates independent living may no longer be safe or appropriate, Operator may document the condition and notify support contacts including:

- family members
- case managers
- emergency contacts
- healthcare providers

Participant may arrange outside support services including:

- home health care
- visiting nurses
- personal care aides
- hospice services
- other assistance

Operator does not provide medical care or supervision.

If Participant's condition creates a safety risk or requires continuous assistance beyond the scope of independent living, the environment may no longer be appropriate.

Participant may be required to transition to a setting capable of providing necessary care.

Operator may assist in communication with support contacts when appropriate.

Section 3B — Live-In Aide Accommodation

Participants requiring assistance may request approval for a Live-In Aide.

A Live-In Aide:

- resides solely to assist the Participant
- is not a Participant in the Program
- is not a tenant or licensee
- has no independent occupancy rights
- must vacate when the Participant leaves or dies

Live-In Aides are not employees or representatives of the Operator.

Operator does not supervise or compensate Live-In Aides.

Section 3C — Hospice and End-of-Life Care

Participants may elect to receive hospice or palliative care services through licensed third-party providers while residing in the residence.

Operator does not provide hospice services, medical care, or clinical supervision.

Healthcare providers entering the residence must comply with Program rules.

The presence of healthcare providers does not convert the residence into a healthcare facility.

The residence remains a **non-medical independent living environment**.

In the event of death in the residence, the licensed hospice provider or appropriate medical authority is responsible for pronouncement and coordination of post-death procedures.

Section 3D — Freedom of Choice for Healthcare

Participants retain full freedom to select healthcare providers and supportive services.

Participants may arrange services including:

- physicians
- hospice providers
- home health agencies
- personal care attendants
- therapists
- community support services

Operator does not coordinate or supervise healthcare services.

Section 3E — Resident-Directed Services

All services arranged by Participant are **resident-directed services**.

Operator is not a party to agreements between Participant and service providers.

Operator assumes no responsibility for services provided.

Section 3F — Personal Autonomy and Refusal of Care

Participants retain full authority regarding healthcare decisions including the right to accept or refuse treatment or medication.

Operator does not enforce medical treatment.

Participants assume responsibility for healthcare decisions.

4. Shared Occupancy Structure

Participant understands:

- Rooms may be shared
- Bed assignments may change
- Occupancy is communal

This structure is fundamental to the Program.

5. House Standards

Participants must comply with reasonable rules for safety, sanitation, and shared property use.

Rules are administrative and do not constitute supervision.

6. Participation Contribution

Participant agrees to provide a monthly participation contribution of \$____

due on the ____ day of each month to support the shared housing program.

Participation contributions assist in maintaining the shared living environment, including utilities, maintenance, and administrative coordination.

Payments made are program participation contributions.

Payment does not guarantee indefinite occupancy and does not create a landlord-tenant relationship.

7. Termination

This license may be revoked for noncompliance.

Upon revocation, Participant agrees to vacate as required by law.

8. Risk & Responsibility

Participant assumes responsibility for:

- personal property
- personal conduct
- healthcare decisions
- services obtained through third-party providers

Operator is not responsible for medical outcomes or actions of third-party providers.

9. Fair Housing

The Program operates in compliance with:

Fair Housing Act
Americans with Disabilities Act
Applicable state and local laws

10. Entire Agreement

This Agreement constitutes the entire occupancy understanding.

If any provision is unenforceable, the remainder remains valid.
